

### **Lamm: continuity and future prospects**

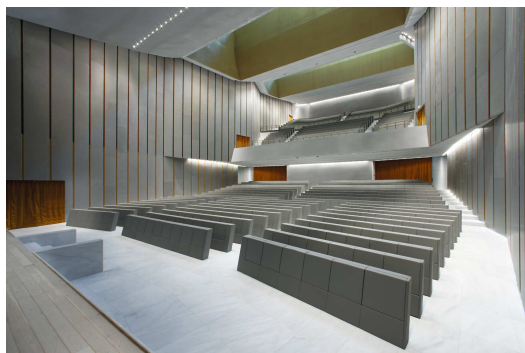

Since 1959 **Lamm** is leader in Italy and all over the world in the supply of furniture for spaces dedicated to community, teaching and conference rooms.

**Lamm** renews its spirit and will by rewriting a new chapter in its history, with a completely new ownership while remaining true to the basic principles that gave birth to the company: quality and culture of doing.

The change of ownership does not represent a break with the past, but continuity with present and future: this continuity is confirmed right now by the increase of orders, among others the University of Missouri, the Amphitheatre for the Palace of Justice of Luanda in Angola, the University of Amsterdam, the University of Pisa, the CNA of Rome, the Ecole de Formation du Barreau of Paris... This is due to a constant productivity and commercial activities and to the "family" management that provides a total involvement of the entire company with the purpose of constant service improvement.

The future of **Lamm** will touch various stages in order to strengthen even more the leadership in the community and auditorium seating sector. Significant steps have been made to achieve a considerable flexibility from a production point of view: from personalized furniture up to special design requests, standard production modifications to meet any kind of project demand.

**Lamm**, thanks to its experience and to the new energies, will continue its course of excellence that has never been abandoned over the last 50 years.
