

## Flaps by Antrax IT gets a Special Mention at the German Design Award 2015

**Antrax IT**, Italian leader in the design and manufacturing of designer radiators with a sophisticated design and superior quality levels, has been awarded a major new international accolade.

With **Flaps**, the radiator devised by the creative flair of *Victor Vasilev*, Antrax IT has been given the *Special Mention* in the *Building and Energy* category at the **German Design Award 2015**.

The German Design Award is a prestigious international award, attributed by the *German Design Council* to excellent designers and companies who have been able to express originality, quality and functionality in their products.

The award will be handed over during an official ceremony scheduled to take place in February 2015 in Frankfurt, by a jury of 29 experts from various areas of the design world and it is the result of a selection from 2,250 projects competing in various categories.

*Flaps*, designed by Victor Vasilev and the winner of the *Interior Innovation Award 2014* as best product in the designer radiator category, is the result of observing the shapes and functioning of plate radiators.

Made entirely of recyclable aluminium affording high heating efficiency, it is distinguished by a 3 mm thick plate, interrupted by symmetrical flaps which give the radiator its name.

*Flaps* is available, in the electric version too, in sizes: 171 x 35 cm, 201 x 35 cm and it can be made in over 200 colour variants.

This major award is proof of the extraordinary commitment on the part of Antrax IT to create products which always afford an original design and a strong personality, capable of producing heat and also of accommodating the most sophisticated styling and functional requirements.
