

Knit

The collection designed by Patrick Norguet is completed with exclusive elements, for a new 'wellbeing' to experience en plein air

Created in 2014 and expanded in 2015, Knit is the star collection in the wide range of offerings from Ethimo. A complete line of tables and chairs, made using teak and woven synthetic fabric fibre, which is expressed with sophistication, for a perfect synthesis of aesthetics, functionality and ergonomics.

In 2016, Knit is adding new elements: the comfortable sun lounger, the love seat with the rectangular coffee table and bergère-style armchair with high backrest, accompanied by an elegant, lightweight footrest to optimise the relaxation experience.

Special furnishings that join the already extensive collection, making Knit an even more versatile family, able to enhance spaces and give them character.

Knit is the expression of Patrick Norguet's desire to 'merge' indoor and outdoor, for a wellbeing experience disconnected from places and habits, with no boundaries.

For the living area, but also in winter gardens, on the terrace, for relaxing in the bedroom, in the garden, by the pool or on the patio: Knit is daily life in the open air, but with that little something extra
