

The tradition of coffee with Liu Jo Living becomes *design* ***Coffee tables* designed by Simone Cagnazzo and Giuseppe Viganò**

Liu Jo Living presents **three coffee tables** designed by **Simone Cagnazzo**, celebrating Italian charm and tradition.

Inspired by the origins and history of coffee, this daily ritual, which unites people from all over the world, is interpreted by **Liu Jo Living's** *Made in Italy*.

An action that is actually part of the daily routine of many peoples around the world. Simple and symbolic, the act of drinking coffee makes everyone feel closer. From the East to the West, it is as if the ticking of clocks is calibrated to move in harmony until coffee time strikes. Enjoying this moment of pause, whether it is in the morning as soon as you wake up or as an after-lunch tonic, is a sign of love and sharing that for **Liu Jo Living** also has intimate ties to the environments in which this habit takes place: the home.

The comfort of a living area that in the overlapping of shapes, geometries and colors, with **Caillou Coffee Table** tells not only the reflections of glass and precious metal but the infinite shades of a moment of well-deserved relaxation. In warmer tones, **Caillou Wood Coffee Table**, available in small and large versions, is reminiscent of the Orient. Rounded profiles of irregular organic shapes in natural wood pander to the desire for a delicate return to the essential.

The contrasts of shapes and shades make **Clip** an element with a contemporary vocation for a living room that wants to be *easy chic*. An exercise in style that lends personality to the environment: a solid, highly functional and sculptural object in which material differences stand out, defining its character.

The **Clip** side table, the name also suggests, thanks to its shifted base is a serving piece designed to sit alongside and on top of a complement. The asymmetrical structure of the table top creates a refined contrast with the linearity of the support highlighting its versatility: a *passe-partout* coffee table, ideal to be placed next to sofas in the living area or to the bed in the sleeping area as a side support.

When the coffee break becomes a time to recharge energy, design also becomes more solid and comfortable. Hence the **Warmover coffee tables**, designed for individual living or as collective contemporary furniture, find maximum expressiveness together with the eponymous of seating system.

In living rooms with a classic soul, **Linear Shore Coffee Table**, designed by **Giuseppe Viganò** recalls the world of fashion, to which **Liu Jo Living** has always been closely linked, and jewelry. Made with a glass top and digital print insert with contrasting textural effect, thanks to the particular foot that evokes the safety pin revisited in a modern key, it draws new shapes for *tailor-made* living areas.

Thanks to their versatility, **Coffee Tables** from the **Liu Jo Living** collection are perfect for creating an atmosphere of relaxation and sharing.

Rethinking the objects of a daily sartorial is part of what for **Liu Jo Living** is a *total look* that can unite the rooms of the house, respecting the architectural characteristics of the spaces and freedom of style that every "home" should have to call itself such.
