

TURRI

The tailoring of *Atelier* by Matteo Nunziati features the *dining* area

In the new *dining* area designed by **Matteo Nunziati** for **Turri** there is a strong remind to haute couture, and it becomes the starting point of a journey featured by a particular attention to details, typical of every masterpiece made by a precious atelier.

The ***Atelier*** furniture is designed to confer elegance and modernity to the environment by interpreting the distinctive mood of fashion and of *Made in Italy*. By translating **Turri's know-how**, every element has been carefully designed to blend functionality and tailoring.

Atelier table represents the core of the dining room: its legs - example of the excellent craftsmanship - are made of three cylinders able to give a great refinement to the structure. The walnut wood together with the brass metal inlays placed in the middle of the legs, embodies the clear and sophisticated aesthetics of the current fashion trends.

Through the same elegant design and clear lines of fashion, ***Atelier*** chairs - available in the version with or without armrest - feature a walnut wood structure enriched by brass metal details placed at the top of the legs.

The version with upholstered armrests gives a high comfort level, perfect for relaxing while seated at the table.

The final piece of the collection is represented by the **cupboard**. An essential element of an excellent *dining room* like the one designed by **Nunziati for Turri**, the cupboard is entirely made of walnut wood with leather applications. The top is also available in marble, indeed the doors can be made of bronze ribbed glass or covered by leather.

Like a fashion accessory completes an outfit, the cupboard has a double identity: it can be an elegant storage and a supporting surface able to display décor objects.

Its inside space with shelves is an ideal solution to storage plates, cutleries, and other essential elements for the dining room.

Every ***Atelier*** detail reveals a bespoke Italian craftsmanship by showing the attention and the excellence of the finishing in the selection of materials and details.

Every collection's element stands out for its uniqueness by transforming into a tailoring masterpiece for the interior design. The craftsmanship and the distinctive style of fashion meet in ***Atelier*** to create a sharing and conviviality experience with family and guests.

All the ***Atelier*** collection will be globally premiered at **Turri Stand (Hall 13 | Booth A09 - B10)** from **16 to 21 April** at the exhibition spaces of Rho Fiera Milano.
